

Encrypted USB memory compatible with high-speed data transfer USB3.0

USB3.0

Traventy® 3

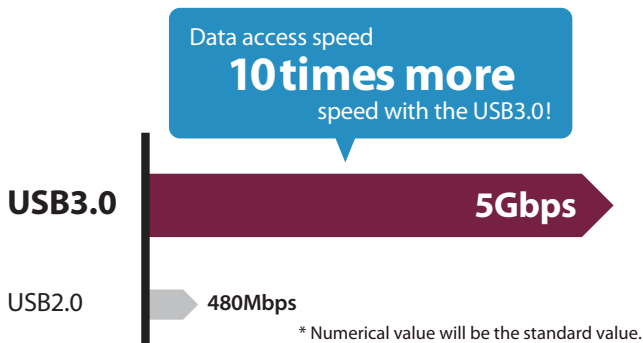

Traventy® 3 is new hardware-encrypted USB memory compatible with high-speed transfer USB3.0 standard.

The advanced Traventy® 3 is easier to use and manage as compared to conventional security functions. In addition to encrypted transfer of sensitive information and virus detection function, it has a new function that can automatically update complex licensing as well and the policies/versions can be automatically updated through a network.

It not only comfortably transfers the data but also performs safe and secure data migration.

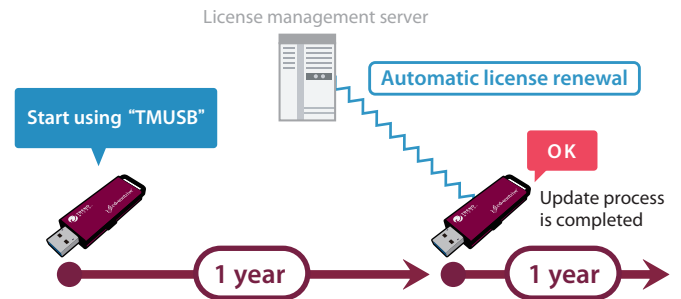

Feature 1 Compatible with high-speed transfer standard USB3.0!

Traventy® 3 contains hardware that is compatible with the new standard USB port "USB3.0". The transfer speed is more than ten times faster as compared to the conventional USB2.0 and it offers comfortable data access.

Feature 2 Automatic yearly update! "TMUSB license automatic update function"

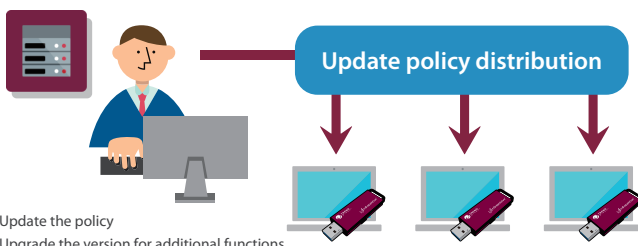

The virus detection software "Trend Micro USB Security™ 2.1(TMUSB2.1)" in Traventy® 3 automatically updates the license on the renewal date. With Traventy® 3, users do not have to worry about updates even if they have forgotten about their license renewal.

Feature 3 Automatic updates through a network! "Policy distribution function"

The policy can be changed or the software version can be completely upgraded in Traventy® 3 through a network. Only the policy is forcibly updated by a simple initialization function without any loss of data! Update results can also be uniformly managed.

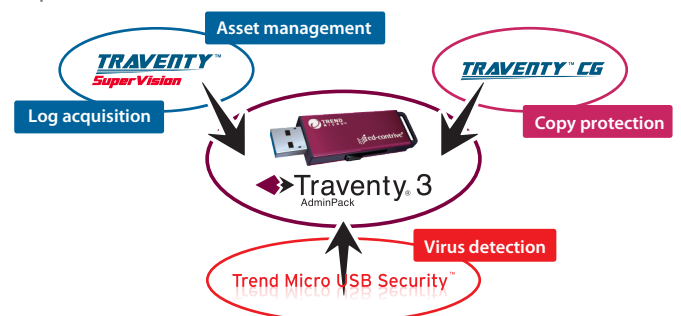

[Policy distribution tool]

- Get update information through network
- Can be forcibly updated without loss of data

Feature 4 All the functions such as log acquisition function / copy protection are integrated!

The past functions such as file operation log acquisition functions or copy protection functions are integrated in "Traventy® 3". In the case of the management function which is optional in the "Traventy® 3 AdminPack", based on the opinion of information system persons-in-charge from almost 3500 companies, the operation management function is integrated as asked by the companies and the quality of the management function is much improved.

Various functions

Robust information security function

- Hardware-encrypted function (AES256bit)
- Password authentication function
- Password policy setting function... Minimum number of digits, limitation of character type, validity, and maximum number of records, Lock / Initialization / Lock + initialization when authentication fails

Good anti-virus function

- Selection with virus detection function (TMUSB2.1)
- Read-only start-up of the data area
- Automatic execution according to Autorun.inf file

Wide range of support environment

- Windows / Windows Server / Mac OS-supported
- No installation required / No administrative authority required

Much convenient operation function

- Simple initialization function without loss of data
- Automatic update function of TMUSB license (*3)

Centralized functions of policy

- Policy distribution function through network
- Function to forcibly update the policy / version

Highly convenient password rescue function

- Unlock / password reset function
- Master Password Settings

Rich body settings

- Message function at the time of USB memory start-up
- Capacity limit settings
- Specification of volume label
- Settings of additional files on drive

Settings of limitation when requirements are met

- Permission to use only in specified environment as per specified conditions
- Copy protection in operation restriction environment
- Settings of estimated usable period (remote period can be extended)

Loss of USB memory / asset management function (*1)

- Ledger management function
- Usage history acquisition (operation date and time, usage environment information)
- Automatic inventory function
- Remote lock / data erase function
- File operation log acquisition function (*2)

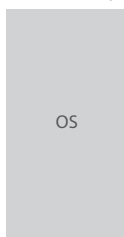

*1) For asset management function, we need to build asset management server software "AssetFinder" that can be freely downloaded from ed-contrive HP.

*2) For file operation log acquisition function, we need a separate agreement of "SV function monthly utility license".

*3) For automatic update function of TMUSB license, you need to purchase "TMUSB update license" beforehand.

Operation environment

Traventy® 3 USB memory body

- Windows 10 Home / Pro / Education / Enterprise (64bit / 32bit)
- Windows 8.1 / Pro / Enterprise (64bit / 32bit)
- Windows 8 / Pro / Enterprise (64bit / 32bit)
- Windows 7 Ultimate / Professional / Home Premium / Starter / Enterprise (~SP1) (64bit / 32bit)
- Windows Server 2008, 2008R2, 2012, 2012R2
- *All OS support Japanese as well as English versions
- However, usage in copy protection environment is supported with Japanese only
- Mac OS X 10.12 / 10.11 / 10.10 / 10.9 / 10.8 / 10.7 / 10.6 / 10.5 / 10.4
- *All OS support Japanese as well as English versions
- *At the time of operation restriction policy settings, operation is done by considering restricted environment regardless of judgment condition.
- *When "Copy protection" is selected in operation restriction, it cannot be used in Mac OS.

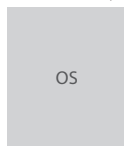

CPU / Memory The minimum operation requirements of OS should be met

USB port USB3.0 / USB2.0

Encryption scheme AES 256bit

Others RoHS directive

Traventy® 3 AdminPack

- Windows 10 Home / Pro / Education / Enterprise (64bit / 32bit)
- Windows 8.1 / Pro / Enterprise (64bit / 32bit)
- Windows 8 / Pro / Enterprise (64bit / 32bit)
- Windows 7 Ultimate / Professional / Home Premium / Starter / Enterprise (~SP1) (64bit / 32bit)
- Windows Server 2008, 2008R2, 2012, 2012R2
- *All OS support Japanese as well as English versions
- *Windows Server is available for Policy Update Tool only

CPU / Memory The minimum operation requirements of OS should be met

* Check our Website for latest operation environment. <http://www.safety-disclosure.jp/>

Lineup

USB memory body

Product name	Model number	JAN code	Price
Traventy 3 / 4GB	TRA04GVV3	4534798901226	¥15,000
Traventy 3 / 8GB	TRA08GVV3	4534798901233	¥20,000
Traventy 3 / 16GB	TRA16GVV3	4534798901240	¥30,000
Traventy 3 / 32GB	TRA32GVV3	4534798901257	¥40,000
Traventy 3 / 64GB	TRA64GVV3	4534798901271	¥58,000

Management software

Product name	Model number	JAN code	Price
Traventy 3 AdminPack	TRAADMTV3	4534798901264	¥40,000

License

Product name	Model number	JAN code	Price
TMUSB update license	SDTLC01V1	-	¥980
SV function monthly utility license	TRASVF1M1	-	¥200

* All prices are excluding tax
